ZED-3 AND XINWEI SIGN PARTNERSHIP AGREEMENT

Partnership will lead to widespread adoption of Zed-3's Multimedia Dispatching System

MILPITAS, CA, 24 April 2008 – Zed-3 today announced the signing of a partnership agreement with Beijing Xinwei Telecom Technology Inc. Under the terms of the agreement, both companies will share resources to promote the solution of a multimedia dispatching system (MDS) based on the wireless technology of SCDMA.

At a ceremony held at Xinwei's headquarters in Beijing Mr. Bin Wen, the Executive VP of Xinwei, and Mr. Wenhua Xing, the General Manager of Zed-3 Beijing, both looked forward to mutual success. Under the agreement, both companies will leverage one other for resources in their respective vertical markets and existing channels. This includes not only products but also the marketing and branding that both companies have developed. Together the companies will promote solutions for the MDS based on the wireless technology of SCDMA. This will provide end users solutions with best performance cost ratio in addition to leveraging other strengths from each company.

"Zed-3 has a very unique product in the market with their IP dispatching system," said Bin Wen of Xinwei. "Coupled with the advanced technology of our SCDMA wireless network products we can deliver to customers a solution that serves critical needs in vertical markets such as airports, railways, seaports, oil extraction, and coal mining."

"The agreement shows the dedication from both companies," added Wenhua Xing of Zed-3. "We are able to offer our unique IP PBX and MDS solutions to a greater market in China. And with the

wider international presence that Zed-3 currently has, we envisage that we can expand to offer the solution in the Middle East and Latin America in time.”

Pricing and Availability

The SCDMA and MDS are available now in China. A typical solution starts at about 1M RMB (\$150k USD).

About Zed-3

Zed-3 provides products that permit people to communicate simply, efficiently, and cost effectively. With careful attention to detail, these IP telephony products work seamlessly together and interoperate with products and services from other suppliers. Zed-3 can provide VoIP solutions to connect home workers, small businesses, and enterprises with multiple offices. Zed-3 has its headquarters in Milpitas, California and has offices in Bangalore, Beijing, and Singapore. The company’s products are distributed in North America, Asia, and Middle East.

About Xinwei

Beijing Xinwei Telecom Technology Inc. was founded in November 1995 and owns advanced technology with essential intellectual property rights to become a driver of the modern wireless communication industry. The company has over 2500 employees.

Based on strong R&D, Xinwei devotes itself to the national telecommunications industry in China. It transforms the technology of smart antenna, synchronous CDMA, air interface channel, and software radios into valuable products and services. The SCDMA WLL System has widely applied in public telecommunications and is the most suitable technology for rural communications. Xinwei will promote the SCDMA to become the main standard in the wireless telecom filed. It is the first time that such intellectual property belongs to China in the history of wireless telecommunication, which should create a new era of wireless telecommunication.
